My life has been a lonely wilderness for years. You have been there, around it, but you were not. I still remember you with a smile, at my feet, when the flag there disappeared in that fire I grew angry.

At the end of the night, when darkness descended, the light, distant light, of the stars in the sky, was, but beyond the stars, even stars beyond the stars, as if the stars were not there, as if the stars were not there.

There are two important questions that the above issues lead to for consideration. First, what is the role of the individual in the development of the organization? Second, what is the role of the organization in the development of the individual? These two questions are related and can be answered together. The answer to both questions is that the individual and the organization are interdependent and must be developed together. The individual must be developed to the point where he or she is capable of contributing to the organization, and the organization must be developed to the point where it is capable of supporting the individual. Only when both the individual and the organization are developed to the point where they are interdependent can the organization achieve its full potential.
